IQeye300 series

SMART NETWORK CAMERAS

Indoor/Outdoor Megapixel Cameras

IQeye300 Series are full featured, programmable multi-megapixel network cameras and feature IQinVision's best-in-class image quality, dynamic range and network stability. They are ideal for construction site monitoring, web-attractions and remote viewing.

As a stand-alone camera, the IQeye300 integrates seamlessly with the leading Network Video Recording (NVR) systems. The IQeye Event Recording System includes everything you need to capture and store images to your network or on-camera *WITH NO BANDWIDTH.*

Customizing the IQeye300 series is simple. Whether you simply want to change the Graphical User Interface or access image information for video analytics, our complete API or available Software Developers Kit lets you do it all.

Every IQeye is designed to operate reliably in the most demanding environments and is the perfect choice for when you can't afford to miss a thing.

IQeye300 - Smart Network Cameras

High Resolution

IQeye Resolution

IQrecorder™

Standard with the IQeye300 Series, IQrecorder enables you to record and playback crisp, clear IQeye Resolution™ images using on-camera recording or affordable network storage *with no client software.*

IQauthenticate™

Every IQeye300 Series comes standard with on-camera, digital authentication that protects images right in the camera. IQauthenticate addresses the image manipulation problem, *at the source*, ensuring your evidence has not been compromised.

IQsdk™

The IQeye300 series has an available Software Developer's Kit that lets you get the video information you need. From complete, uncompressed images to raw pixel information, the IQeye300 series is the perfect distributed processing platform for video analytics.

- **LIGHTGRABBER™ 0.3 lux low-light performance**
